theoretically, it might be possible if you're making a ppp or slip connection to an isp. not sure the connection will be fast enough to do ANYTHING with, though. you'd timeout pretty frequently.

Subject: Re: wannabe AIX webserver Q

If I got a 2nd hand 7026-H50, and installed Apache,  
can I be a webserver now if I have a dial-up connection  
to any TTY port ?

My next question would be – how do I make the dial-up  
TTY port a fake TCP-IP address? I don't mind the speed  
for now, just a connection that would work.

Joe
