I moved this 5.2.02 Box into our DMZ. I locked down inetd ports, but feel I have re-opened them up again.

Now, trying to Xterm in, I get the following. I wonder if my firewall guy is stopping me?

Any help today? TIA!!!

```
ksh: @: not found.  
/usr/bin/X11/xterm Xt error: Can't open display: x.x.x.x:0.0
```

Ports that are open:

```
netstat -a|grep LI  
tcp 0 0 *.ftp *.* LISTEN  
tcp4 0 0 *.ssh *.* LISTEN  
tcp 0 0 *.telnet *.* LISTEN
