Folks,

I am trying to find the OS level and maintenance level for one of our servers

I try "oslevel -r" and get nothing back

I tried "oslevel -q" and get back:

Known Maintenance Levels

5.2.0.0

I tried both on another server and get back:

oslevel -r

5200-02

oslevel -q

Known Maintenance Levels

5.2.0.0

How do I find the maintenance level on the first server?

Thanks!

Dave Zarnoch
