Hi everyone,

I'm sorry for the off-topic question, but I'm trying to use all the resources I can to come up with some solutions for a task I need to finish.

Does anyone have (and are willing to share in electronic format) any type of documentation that is used at your company for QA/QC app/system testing ?

I have an Extranet going live, and several more right behind it that I need to develop some QA/QC tests for and, although I have some concepts and ideas on paper, I'd like to see what exists out there.

Thanks, Bill.

There's no place like /home
