5.1 and 5.2 are separate animals. There is no need to migrate to 5.1 as an intermediate step to 5.2. All you'd be doing there is doing another migration.

Go straight to 5.2

Hi All, I am sure that this may have been discussed before. Just wondering if there are any major problems with migrating from 4.3.3 direct to 5.2. Is it better doing it in steps going to 5.1 first then 5.2?

Re: AIX 4.3.3 to AIX 5.2

Regards,

Billy.
