Something like....

```
sed -n -e '/Average/p' -e '/^Total Paging Space/{N;p;q;}'  
dailylog200411011.log
```

Subject: Re: Search of Text

I am attaching the log file for your reference.

Now I want to extract average of sar for first iteration and percent of paging space used.

Thanks in advance.

Regards

Akash Jain

I don't really understand that. Can you give an example of the data, and also all of the file names and types in the directory? Examples of the real data involved are always easier to deal with than descriptions, unless you give a very specific description, (like you'd used for a program specification).
