Hi,

thanks for your help.

Now I find the logical volume / filesystem. But what is the problem? The filesystem is not 100% in use

```
# ls -l | grep "43, 11"  
brw-rw----- 1 root system 43, 11 Oct 04 11:08 lv_cm_data  
crw-rw----- 1 root system 43, 11 Sep 29 09:00 rlv_cm_data  
(root:srvdms0)[/dev]
```

```
# df -k | grep lv_cm_data  
/dev/lv_cm_data 524288 41228 93% 785 8%  
/cmarchiv/cmdata
```

000b is 11 --> look for 43, 11

Subject: error concerning filesystem [Virus checked]

Hi,

I get a error concerning a filesystem.

Now I have 2 questions:

- What is the way to find out which filesystems is concerned?
- What can I do? Because all fs have unused space. I cannot find any fs with 100% in use.
