Redirect the entire for loop results, and don't forget to mix stdout and stderr :

```
for i in `cat /home/backup/lvdir`
do
/usr/sbin/backup -0 -u -f /dev/rmt1.1 $i
echo "* \n"
echo "* End of backup file system: $i \n"
echo "***** \n"
echo "* \n"
done 2>&1 | tee -a /tmp/backup.log
```
