As long as the app(sap.db2) can support it, which from what I've read it can, you should be fine.

The o/s should be fine. Unless anyone has any known issues or recommended maintenance levels?

Thanks.

Hi Everyone,

I just thought of taking your opinion before I do on production system,

This weekend I am planning to switch AIX5.2 to 64bit on S80 system which is running SAP/DB264bit to improve our system performance(IBM expert recommends). Last weekend I have done AIX64bit migration on

AIX-L: Re: AIX5.2 64bit migration

couple of pSeries partitions and no problems reported.
Does any one have any recommendation,concern before going 64bit on
S80/AIX5.2 machine.
Please advice.

thanks in adv.
muthyam.
