It is recommended to reboot the system if you are changing time zones. Other than that the time and date change should be dynamic as far as the o/s is concerned.

Thanks.

Subject
Time and date Change

Hello AIXers,
we plan to change date and time on a Testmachine to test behaviour of an application using Summer and Wintertime.
Are there any impacts on the OS?
Will I have to recover the hole System?

Cheers,
ku
