instfix does not list this fix, neither installed nor uninstalled
on ibm fixdist-site i cannot find this fix
are you sure IY68776 is the correct number?

We had a similar problem , losing disks within a VG (5.3), thus losing
the VG.
IY68776 fixed this issue

Subject: vg-problem

Hello,

I migrated a system from 5.1 to 5.3, everything went fine.
Before migrating, I did a alt_disk_install to hdisk1.

Now all tests are done without problems and I want to move
hdisk1 to rootvg again.
alt_disk_install -X hdisk1
went fine.

But now I got these problems:

I digged through all odm-classes; there is no entry for this device/vg id.

There is only one file where this string (this vg-id) is written: /etc/objrepos/CuAt.vc .

AIX-L: Re: vg-problem

Any hints? Or at least some information about this CuAt.vc ?

Regards,

Holger
