Subject: Re: Scripting help please

Shawn,

Thanks for the help.

But one glitch, I need to output the whole line, not just the string after the \$.

```
109889-01 : 109353-04,109353-04 : : $ SUNWkvmx* SUNWkvm * SUNWctu*
```

Like this?

```
biermans@sf1n04en4:/home/biermans > cat xxx
```

```
109889-01 : 109353-04,109353-04 : : $ SUNWkvmx, SUNWkvm, SUNWctu,  
SUNWmdb
```

```
biermans@sf1n04en4:/home/biermans > cat xxx|awk -F'$' '{print $2}'|sed
```

```
-e's/,*/g'
```

```
SUNWkvmx* SUNWkvm* SUNWctu* SUNWmdb
```

Re: Scripting help please

AIX-L: Re: Scripting help please

>>> *prasad@IDC.CENDURA.COM 5/4/05 7:59:13 AM* >>>

I need some scripting help please.

I have a file which has the following output.

I need to change the commas after the \$ to a \* (or any other character other than a comma).

Only the commas after the \$ need to be changed.

109889-01 : 109353-04,109353-04 : : \$ SUNWkvmx, SUNWkvm, SUNWctu,  
SUNWmdb

Thanks in advance

Prasad
