Try:

```
# mkboot -c hdiskx
```

If that doesn't work verify the checksum with the: "sum" command against the:

"/etc/bosboot.sum" file and the: "/unix" file/directory, to see if the checksum/numbers match up exactly.

Thanks,.

unmirrorvg & bosboot problem

AIX-L: Re: unmirrorvg & bosboot problem

I was able to unmirrorvg rootvg in preparation of doing an alternate disk install to ML 05 from AIX 5.2 ML04 and the unmirrorvg was successful. I did perform a chpv 'c hd5 and then a bosboot 'a but I receive the following:

bosboot: Boot image is 19728 512 byte blocks.

0301-162 bosboot: savebase failed with /dev/hdisk0.

0301-165 bosboot: WARNING! bosboot failed – do not attempt to boot device.

What did I do wrong (the chpv 'c hd5 command)?

What do I need to do to fix it?

Please help!
