Hi,

I am doing a mkysyb to DVD, all goes well, to a point, it starts to copy the files to the DVD:

```
cmd: mkcd -U -d /dev/cd0 -M /opt/mkysyb
```

```
Initializing mkcd log: /var/adm/ras/mkcd.log...
```

```
Verifying command parameters...
```

```
Creating image.data file...
```

```
Creating mkysyb image...
```

```
Populating the CD or DVD file system...
```

```
Copying backup to the CD or DVD file system...
```

Then that's it, it seems to continually copy the files without finishing, I killed it after it had been running for 5 hours copying the files to DVD.

Any idea's.

Thanks

David
