Subject: AIX Upgrade recommendations – 5.1 to 5.3

Hi,

We'll be upgrading one of the AIX servers from 5.1 to 5.3 and I'm much familiar with Solaris / HP-UX.

Server details:

P650

Actual OS level: 5.1.0.0

Storage: IBM FastT700

2 CPU on each partition, 18GB split 10 and 8 GB each. (LPAR)

Any chance to get some step-by-step guide for doing this? Special recommendations?

Thanks in advance.
