It looks as if the system needs to be rebooted. I will assume you just did an upgrade. Run 'instfix -i | grep _ML' to ensure you don't have problems with your filesets, too.

Subject: sysback lvm_queryvg_ext error

4.3 to 5.3.02. Any thoughts on this sysback beauty: mkysyb looks bad too?
thank you.

Generating LVM information ..

exec(): 0509-036 Cannot load program getvginfo_ext because of the following errors:
