

Where is the CSM dping command

I've been reading up on various monitoring commands for CSM and came across "dping" in the command reference. However, the command doesn't appear to be present on my CSM HMCs.

According to the manual, it should be in /opt/csm/bin, but it isn't. "which_fileset" doesn't show anything for it.

The HMC is at AIX 5.3 ML01, running CSM 1.4.

Any ideas where I might find this?
