Do a

strings core|more

does it say, the reason for the core dump?

Check your maintenance level. There have been a number of fixes for problems with JFS2 this year, affecting 5.1 and 5.2, (I'm not sure about 5.3).

For 5.1, you probably need to be at ML08.

All,

I'm having a coredump problem creating a striped LV. Works fine if i don't try to stripe. Anyone have any ideas before i call IBM? Thanks.
