Goog Morning

I have the following problem:

on a box with aix 5100-03 the user oracle run awk and present that it's killed:

```
[gestel][/]>su - oracle
Bienvenido: oracle
[gestel][/oracle]>awk
Killed
[gestel][/oracle]>exit
[gestel][/]>wak
ksh: wak: not found.
[gestel][/]>awk
Usage: awk [-F Character][-v Variable=Value][-f File|Commands][Variable=Value|File ...]
```

I create other user and don't have the same problem. Only oracle. How i can to fix this problem?

Thanks to all.

regards

Oscar Torres
