Anybody know how to fix this problem?
I have a number of other servers and they all work fine.

Start Survey.

server1: downloading microcode catalog

.. server1 MDS survey

server1:808 : failed to receive data.

Creating MDS report.

Error server1 : zero length survey.

MDS report written to : C:\TEMP\MDS_survey.html

Survey complete.

- This is my only 5.1-08 server.
- Invscout versions are 2.1.1.0 which looks to be the latest for 5.1.
- invscoutd is running.

Any feedback?

Mark
