Hello \*

**Problem:** AIX 5.3 NIM stops after installing rpms  
without any error message and before finishing installation

**Question:** Has anyone else seen this behavior ?  
NIm stops after cdrecord / mkisofs rpms ( exist duplicate  
by two different bundles)

**Detail:** I am using nimol for linux, goal is aix install form laptop  
It is working for me for 3 Variants:  
AIX 5.2 minimal  
AIX 5.2 maximal ( all CD's in a lpp\_source)  
AIX 5.3. minimal ( small lpp\_source)  
AIX 5.3 with a full lpp\_source shows above Problem

Even if i switch Debug on, i get no trace, whats going wrong.  
It would also help, if anyone has a hint which step would be  
next after installing rpms ...

TIA  
Micha
