I guess that /etc/exclude.rootvg is missing.

Look at the resources allocated to the machine and check the details of the excludefile resource. Either remove that resource, or create the necessary exclude file.

Subject: NIM mkysyb images

Hello All:

I am getting the following error when using the NIM process to create a
mkysyb image:

0042-001 nim: processing error encountered on 'master':

0042-207 m_mkbsi: Unable to allocate the excludefile resource to
host

Has anyone seen this before?
