Good morning! All,

I have 7038-6M2, 7026-6H1, and 7026-H70;

GXT135P A/D 2D Graphics Adapter for 7038-6M2

GXT130P 2D Graphics Adapter for 7026-6H1

GXT130P 2D Graphics Adapter for 7026-H70

A 7133-D40 attach to each machine.

Could someone share experiences on installing SuSe Enterprise Server 9 for IBM Power please?

I am thinking some service like GroupWise is running on it if it is possible followed by decommission them.

I appreciate it in advance!

Tom Kimm.
