Need more info as stated.

It could almost be worth; undoing your new mirror config and putting the bad drive back in and removing it correctly.

ODM issues can be dangerous.

Re: remove missing disk with ID only

VGID?

What sort of disk is it? Is/was it part of an array or just a normal
disk,
with mirroring controlled by LVM?

I had a mirror disk replaced and I can not get the old ID
on the bad disk 'reduced' from the volume group.

Whats the best way to clean this up?

Joe
