powermt display dev=all, everything look okay or is one hdiskpower0
hdisks dead?

I'd do all of the following in a maint window.

powermt check; might ask you if you want to delete the hdisk associated
with one bad hdispower0
powermt check
symask refresh
symcfg discscover

Could be odmclean up time.

I agree exportvg, importvg
redefinevg
recreatevg

export/import?
recreatevg?

Re: Duplicate disk in a volume group

hdiskpower2 0001fb7ffa2e124 vg00
active
hdiskpower3 0001fb7ff9b0756 vg00
active
hdiskpower4 0001fb7ffa2c10d vg00
active
hdiskpower5 0001fb7ff9ae733 vg00
active
hdiskpower6 0001fb7ffa2e4ea vg00
active

Any idea how this can be cleaned up ?

Thanks, Bill.
