We are planning a similar migration (AIX 5.1 to 5.3 with Sybase) and would be interested in how it goes for you in general.

Subject: [aix-l] H80 5.1 to 5.3 : any performance issues after migration

I am migrating 3 h80's from AIX 5.1 to 5.3.

Currently these are database/data warehouse machines,
(Sybase) and are 40 to 50 % idle during production hours
Mon – Fri 8–6. We see about 7% yearly growth in
utilization.

Has anyone seen any migration induced performance issues
related to the 5.1 to 5.3 upgrade? The users would like to keep

Re: H80 5.1 to 5.3 : any performance issues after migrati on

Re: H80 5.1 to 5.3 : any performance issues after migrati on
the current hardware – DS6000 based – for the next 2 years
before upgrading .

Thank you for any comments,

John Yard
