Hi all,

I've been searching for options for DOD-Wiping of SSA drives via AIX...

I had to do this for a government customer decommissioning an old M80 with 2 drawers of SSA, and the 'bcwipe' utility that the DOD suggested would not run properly on AIX.

We ended up getting approval to simply do the low-level format (SSA Diags) 3 or 5 (can't remember which) times on each drive.
