I needed a 2nd ethernet adapter installed in one of my older servers so I borrowed this adapter from a server running Aix 5.2.

Seeing as how I am still running 4.3.3 I'm unable to just go to IBM and get the fileset I need (devices.pci.1410ff01).

Anybody have any suggestions on how I might obtain this?

If I have Aix 4.3.3 updates CD's would they possibly have the fileset or would that only be if my original install had it?

Mark
