Subject
Ldap user create issue

Hi,

Just configered IBM -TD 5.2 ldap server and client. All seems OK on the users that were exported on setup..

But when I try and create a new ldap user on the server I get :

```
# mkuser -R LDAP xtest88
```

Group "staff" does not exist.

Check "/usr/lib/security/mkuser.default" file.

But the staff group is present in the file (see below) . Googling this

Re: Ldap user create issue

say's if you have NIS installed you will get this error, but I have no NIS installed.

Does anybody have any pointers on how to solve this,

Thanks

David

(5.3 ML 4)

```
# more /usr/lib/security/mkuser.default
```

```
user:
```

```
pgrp = staff
```

```
groups = staff
```

```
shell = /usr/bin/ksh
```

```
home = /home/$USER
```

Thanks

David
