Hello,
I've just signed up to this mailing list. I'm pretty new to AIX but have been using z/OS and z/VM for many years. (I miss xedit :-)

Heh, you don't have to miss xedit. Check out 'THE' (The Hessling Editor)

<http://hessling-editor.sourceforge.net/>

The more I learn about vim, the more I like it... just plain vi on the other hand... (or maybe we have a particularly old version... :-)

Now, if I can just convince people we need to install vim...

Thank you for the other information too...

Cheers,
Don
