

freebsd-arch: newbus ioport usage

newbus ioport usage

To: arch@freebsd.org

I have a driver that knows the IO port it wants. It's not set up by a parent bus, so I can't use `bus_set_resource()`. This call returns NULL. Any idea how to debug why newbus is rejecting this request? The io port is not in use and the rid is unique.

```
bus_alloc_resource(dev, SYS_RES_IOPORT, rid, 0x101c, 0x101c, 1,  
    RF_ACTIVE);
```

Thanks,

-Nate
