Hi All,

I'm just trying to learn vinum so am trying to create a stripe out of 2 MD disk disks.

I've create two md deivce //dev/md[01]

then

```
fieldpoint# bsdlable -w /dev/md0
```

```
fieldpoint# bsdlable -w /dev/md1
```

```
fieldpoint# vinum
```

```
vinum -> stripe /dev/md0h /dev/md1h
```

```
Can't create drive vinumdrive5, device /dev/md1h: Can't initialize drive vinumdrive5
```

Is what I'm doing possible?

Cheers

Rus
