The snapshots on ftp.freebsd.org are only produced every few months.

> In build log file

<ftp://snapshots.jp.freebsd.org/pub/FreeBSD/snapshots/i386/6.0-CURRENT-20041224-JPSNAP.log>, you can see THIS error

snapshots.jp is in need of working hardware to produce the snapshots.
They need a donor.

Search the mailing list archives – there are other sources of unofficial snapshots, which I don't remember right now.
