I did a full build for phk some time ago, I don't remember how many broke but it was enough to make it a significant (but perhaps not difficult) task to fix them.

I think it would be helpful to do another run if possible and put the results online somewhere. That could significantly speed up the whole issue.

That would be nice. And toss the list to me and Joel in case you do it, we will add an entry on the ideas list for this.

I don't have time to rerun but here is the list from last time as a starting point:
