

make release problems with sysutils/mkisofs and sysutils/cdrtools distfile

Source: <http://unix.derkeiler.com/Mailing-Lists/FreeBSD/current/2007-08/msg00787.html>

I've been trying to make release, a 7.0 snap on a new current box and yesterday made it to mkisofs that doesn't seem to be in ports any longer so I installed it but didn't ask about it yesterday and today I got to it not finding the dist file for cdrtools. Could there be a make problem in src/release or could I be doing something wrong?

Thanks,

ed
