

Installer DHCP in Virtual Box doesn't work

Hi,

I've just tried to install the FBSD7 Beta1 on my VirtualBox (version 1.5.2) using the boot-only-image. During the install process the installer wasn't able to get an IP via DHCP. However this works with 6.2 and 6.1 boot-only-images.

Is this a problem of VirtualBox or is it an Installer problem.

Cheers
Jochen
