Greetings,

I've encouted little difficuluty, don't know what exactly has happend, but after installing W2K on the other disk, disklabel on my primary disk disappearad /FREEBSD4.9/. Only thing I can do is to mount /dev/ad0s1 unfortunately I can't access /dev/ad0s1[a-f] due to inccorect super block message. disklabel prints this:

```
vanice# disklabel -r /dev/ad0s1
```

```
# /dev/ad0s1:
```

```
type: ESDI
```

```
disk: ad0s1
```

```
label:
```

```

Is there a chance I can see my data again?

Thank you

Martin Vana
