hi,

i can't use dumpon, since the kernel is panicking on boot, so
tried in loader.conf:

```
dumpdev="/dev/ar0s1b"
```

but getting:

```
db> call doadump
```

```
Cannot dump. No dump device defined.
```

```
0x25
```

i need this is for current 6.0

thanks,

danny
