Hi hackers,

I find that I can't include <net/ethernet.h> when I programming with libnet,because \$(CC) complains that "struct ether_addr redefined". But I need some definitions in <net/ethernet.h>,struct ether_header etc. Currently,I just copy the definitions I need from <net/ethernet.h>,but it seems very ugly.Any one has some good ideas?

Thanks.

Three passions, simple but overwhelmingly strong, have governed my life: the longing for love, the search for knowledge, and unbearable pity for the suffering of mankind.
