: I would like to know if existe some header ".h" in FreeBSD so
: that I can make a direct access to hardware in machine with C.

Yes. There is. However, without knowing what you want to do, it is impossible to recommend which one of the many .h files can enable this functionality. What's your hardware look like that you wish to get access to. One caveat: unless you have a driver, you can't have a interrupt.
