I get a LOT of corrupt mailboxes. Just 187 mailboxes and daily problems. It's always the same error in the log files: "-ERR Unable to process From lines (envelopes), change recognition modes."

I've done some research and don't know any more about where the problem lives than I did before. I know that some From: lines are missing the colon, but I don't know why. Can anyone recommend a more forgiving popper or MTA? I'm running QPOP 2.53 and Sendmail 8.13.6.
