Hi,

There was a discussion late last year about how to fix the warnings in `sys/sys/hash.h`.

<http://lists.freebsd.org/pipermail/freebsd-net/2006-October/012098.html>

There were a few suggestions put forward but nothing was ever committed. I need to include this file in the kernel for a new driver but do not know enough about this type of warning to fix it. Can anyone recommend the correct fix?

```
@/sys/hash.h: In function `hash32_stre':  
@/sys/hash.h:97: warning: cast discards qualifiers from pointer target type  
@/sys/hash.h: In function `hash32_strne':  
@/sys/hash.h:116: warning: cast discards qualifiers from pointer target type
```

cheers,
Andrew
