Hi,

Is FreeBSD restricting non-students from not taking up any project that is 'suitable for summer of code'?

For eg.

I was planning to take up the 'super tunnel daemon' project some time back. I had done some initial work but now i find that it has also been marked as 'Suitable for summer of code'. I am no longer a student. I am working currently at a firm. So i dont think that i will be eligible for the summer of code. Can i still take up the project or am i forced to take up those that are not marked as 'suitable for summer of code'?

Also, if someone has taken a summer of code project can no-one else take it up as a normal project to contribute to FreeBSD ?

Awaiting a reply,

Ajay.

I saw

>> some project ideas marked as "Suitable for Summer of code" on the project

>> ideas web page. But have any of those projects been taken up?

Re: Have people started working on any Google Summer of code 2007 project?

We've extended the deadline for student applications to Monday, March 26, 2007.
