Is there some sort of util that will allow me to do cut'n'pasting among different pdfs, or at the very least, only to print certain ranges out of pdf docs, so I could do paper-wise cut'n'paste? An all-electronic solution would be best, but I'd take whatever offered.

Lots of tools have already been mentioned. I'll just throw in pdflatex+pdfpages. You can easily zoom, rotate and N'up pages of different PDF files.

Cheers,
Ulrich Spoerlein
