Hi,

I've set "ipfw add pipe 1 ip from any to any 80;ipfw pipe 1 config bw 2Kbyte/s" but ipfw don't limit the bw of the port 80. If I set an IP (from xxx.xxx.xxx.xxx), ipfw limits the bandwidth, but with this config, ipw doesn't limit the bandwidth.
I have DUMMYNET on the kernel..
Anyone knows the solution?

Best Regards,

Carlos Silva
