bostondriver> I'm now going to sites that put one in http proxy hell.
bostondriver> I need to ssh out using OpenSSH's ProxyCommand feature.
bostondriver> The only port out is 443.

Some friends run a shell server. "vex.net" ... here in Toronto.
They're FreeBSD and they're clued... and a shell account isn't too
expensive.

Dave.
