Hi,

On 8/10/06, Mark Bucciarelli <[mark@xxxxxxxxxxxxxxx](mailto:mark@xxxxxxxxxxxxxxx)> wrote:

There's a scary security alert from yesterday out and no port update so I judged it to be isp-related. I looked for ports-security list but didn't see one.

You know, that might be a very good idea -- e.g. have a security team and list for ports as we have one for the base distribution. There should be enough volunteers.

What would the FreeBSD security officer say about this ?

Regards,  
Adrian.  
Ady ([@freebsd.ady.ro](mailto:@freebsd.ady.ro))
