Quoting Francisco Reyes (lists@xxxxxxxxxxxxxxxx):

John Capo writes:

We also offer Sophos as an extra cost option due to its cost. Sophie and Sophos have never burped once in the 5 years we have used that combo. Highly recommended but not cheap.

Thanks for the pointer.

Started to look into Sophos. Will make a point to get pricing/info on it.

Do you use it in conjunction with ClamAv or as a standalone?

If the customer account has Sophos enabled, the mail will be scanned with ClamAV and Sophos. The interface to both is based on the amavisd-lite package.

John
