For this same reason, I've removed a couple of duplicate IPFilter headers from HEAD 2,5 years ago, including src/contrib/ipfilter/ip_nat.h:

: revision 1.2

: date: 2001/06/18 15:54:04; author: ru; state: dead; lines: +0 -0

: Removed duplicate copies of files already present in sys/contrib/ipfilter.

:

: Not objected to by: -arch

No, I'm not volunteering to do the MFC. ;)

Cheers,
