Hi,

I am using FreeBSD 5.4-STABLE FreeBSD 5.4-STABLE #2: Tue Jun 7 23:41:06 CEST 2005 brane@office.mobila-pu.si:/usr/obj/usr/src/sys/mobila i386

and i have one big problem with lan...

If i use mpd then some sites dont work on lan (www.hp.com www.najdi.si)
but if i use ppp then everything work.

My configs

natd.conf

interface ng0

dynamic yes

use_sockets yes

/etc/ipfw

#natd

/sbin/ipfw 15 add divert natd all from any to any via ng0

sysctl.conf

security.bsd.see_other_uids=0

security.bsd.see_other_gids=0

security.bsd.unprivileged_read_msgbuf=0

net.inet.tcp.blackhole=2

net.inet.udp.blackhole=1

vm.swap_idle_enabled=1

kern.ipc.maxsockbuf=2097152

kern.ipc.somaxconn=2048

kern.maxfiles=65536

kern.maxfilesperproc=32768

net.inet.tcp.rfc1323=0

net.inet.tcp.delayed_ack=0

net.inet.tcp.sendspace=32768

net.inet.tcp.recvspace=32768

net.inet.udp.recvspace=32768

net.inet.udp.maxdgram=57344

(no subject)

freebsd-net: (no subject)

```
net.local.stream.recvspace=32768
net.local.stream.sendspace=32768
net.inet.icmp.drop_redirect=1
net.inet.icmp.log_redirect=1
net.inet.ip.redirect=1
net.inet6.ip6.redirect=0
net.inet.ip.sourceroute=1
net.inet.ip.accept_sourceroute=1
net.link.ether.inet.max_age=1200
net.inet.icmp.bmcastecho=0
net.inet.tcp.drop_synfin=1
net.inet.ip.fw.verbose=1
```

I think that it isnt problem in configs.... because as i said with ppp
everythink work fine. I had same issues with freebsd 4.11.

greetz, mile
